Professional Summary

Mobile Engineer with 3+ years of experience building scalable mobile applications. Proven ability to improve app stability through performance optimization, refined state management, and clean, maintainable code. Detail-oriented, collaborative, and able to deliver end-to-end features efficiently.

Work Experience

Mobile Developer | PT. Sarana Pactindo | Bandung | 01/2024 – Present

- Developed and maintained a wide range of core financial features across multiple mobile banking applications, including top-up, bill payments, transfers (Overbook, Online, BI-Fast), Virtual Account, purchases, time deposits, online customer onboarding, integrated third-party services including e-wallets (GoPay, Dana, OVO) and QRIS for seamless digital transactions.
- Improved code quality and application reliability, maintaining 85% crash-free rate and 88% SonarQube score then achieved high test coverage across projects: up to 90% automation test coverage (Katalon) and 65% unit test coverage (Flutter), ensuring long-term stability.
- Implemented security enhancements such as advanced transaction validation, biometric authentication, and device security validation to reduce fraud risks.
- Working and communicating perfectly with backend, QA, PM, and product teams throughout the development lifecycle from requirements clarification deployment to ensure smooth and high-quality feature delivery.

Mobile Developer | Yayasan HSI AbdullahRoy | Yogyakarta (Remote) | 07/2025 – Present

- Assisting in code reviews to maintain clean, readable, and maintainable code.
- Analyzing existing code to identify performance, UI, and logic problems..
- Developed donation features integrated with payment gateway to support foundation events and fundraising activities.
- Fixing bugs and resolving technical issues across the Flutter application

Mobile Developer | Telkom Indonesia | Jakarta | 01/2023 – 12/2023

- Developed and maintained mobile applications across multiple platforms (Android and IOS) to support agricultural field operations, merchant transactions, and smart farming automation.

- Maintained high code quality through active participation in code reviews and testing efforts, ensuring adherence to best practices and coding standards.
- Implemented IoT integration and real-time monitoring features to support smart agriculture technology through mobile application.

Junior WordPress Developer | PT. Global Mapping Studio Indonesia | Bogor (Remote) | 06/2022 – 03/2023

- Developing and maintaining company and client websites using WordPress
- Customizing WordPress themes and plugins based on project requirements
- Building landing pages, company profiles, and product pages
- Integrating websites with additional features such as forms, maps, data-driven systems and Optimizing website performance, responsiveness, and basic SEO
- Handling routine maintenance including plugin updates, theme updates, and security patches

Teaching Assistant – Data Structures & Algorithms and IT Fundamentals | Universitas Pendidikan Indonesia | Bandung (Hybrid) | 02/2022 – 05/2022

- Led and facilitated hands-on practicum sessions for Data Structures and Algorithms, ensuring students mastered core concepts such as linked lists, trees, sorting, searching, and algorithm optimization techniques.
- Provided one-on-one mentoring and support to students during practicum sessions, helping them debug code, optimize algorithms, and develop efficient data structure implementations.
- Conducted practical labs for Introduction to Information Technology, bridging foundational IT theory with real-world applications to enhance student understanding.

Education

Bachelor Degree in Software Engineering — Universitas Pendidikan Indonesia | 2024

Key Skills

- Cross-Platform Development — Flutter, Dart, React Native, JavaScript/TypeScript
- Native Android — Kotlin, Jetpack Compose, Coroutines, ViewModel
- Native iOS — Swift, SwiftUI, UIKit, Combine
- State Management — Bloc, Riverpod, Redux, Context API
- Architecture & Design Patterns — Clean Architecture, MVVM, MVI
- Networking & Local Storage — REST API, Dio, Retrofit, SQLite, Hive, Room
- Testing & CI/CD — Unit Testing, Widget Testing, Fastlane, GitHub Actions

Projects

- Panin Dubai Syariah Banking (PDSB) Mobile — Developed a mobile banking app for Panin Dubai Syariah Bank, covering core banking features such as fund transfers, transaction history, and account management. Delivered a stable cross-platform release on Android and iOS.
- Sultra Mobile Banking — Built a mobile banking solution for Bank Sultra, enabling customers to perform financial transactions digitally. Improved banking accessibility for regional users across Sulawesi Tenggara.
- Maspion Electronic Banking (MEB) — Developed an electronic banking application for Bank Maspion, supporting retail banking operations including transfers, bill payments, and account monitoring across Android and iOS platforms.
- Panin Dubai Syariah Banking (PDSB) Merchant — Built a merchant-facing app for Panin Dubai Syariah Bank, enabling business clients to manage transactions, monitor sales, and process payments efficiently.
- Panin Dubai Syariah Banking (PDSB) Approval/Token — Developed a dedicated approval and token authorization app to strengthen transaction security for Panin Dubai Syariah Bank, supporting two-factor authentication and real-time approval workflows.
- Sultra Mobile Merchant — Created a merchant application for Bank Sultra, allowing business owners to accept payments, track transactions, and manage their merchant accounts from a single mobile platform.
- PAC Cash — Built a cash management application to streamline cash flow monitoring and reporting, enabling users to track income, expenses, and financial summaries in real time.
- HSI Edu App — Developed an educational mobile application for HSI, providing learning materials, course tracking, and user progress monitoring to support digital learning experiences.
- Agree Field Assistant — Built a field assistant app for the Agree ecosystem, enabling field agents to collect data, manage visits, and submit reports digitally, reducing manual paperwork and improving operational efficiency.
- Agree Superapps — Contributed to the development of the Agree Superapps platform, integrating multiple agricultural and financial services into a single app to serve farmers, merchants, and financial institutions.
- Agree Merchant — Developed the merchant module within the Agree ecosystem, allowing agribusiness merchants to manage product listings, process orders, and monitor sales performance on mobile.
- Profile Company GlomapsIndo — Built a company profile application for GlomapsIndo, showcasing business information, services, and geospatial solutions in an interactive and visually engaging mobile experience.
